Software Engineer

My first experience in Bizeta was working for the GShop Suite making small integrations and by creating an ETL connector (.NET Core) for GShop Suite and [IdStore](#) to replace older handhandled Windows CE devices with newer Android ones (Xamarin Android). Two years ago i was moved into the development team for [OneStore](#), which is part of the Software Business Unit of Custom S.p.a. OneStore is a point of sale solution for the retail fashion and luxury sector. The Backend is developed in its entirety with .NET and recently I started developing more and more on the frontend side in ReactNative and bundled with [Expo](#).

Other technologies used: SQL Server, Azure SQL Server, SQLite, Azure Dev For version control and branch workflow: Git with Azure DevOps, GitKraken (Git GUI), using release branch workflow with pull request policies

.NET Core AzureSQL SQLServer T-SQL SQLite Angular AngularJS ReactNative Azure DevOps CI/CD Git Expo
